

## StrapBandit® the innovative pallet threading tool

The StrapBandit® is a professional and light weight threading tool, designed to easily feed corded and plastic strap under and through pallets while standing comfortably upright. This means strapping more pallets in less time and without ergonomic injuries.

### How?

Simply clamp the strap band in the feeder. Use the flexible handle to feed the StrapBandit® through the pallet. Its smart design ensures that the tool doesn't get stuck. The StrapBandit® is easy to use in a standing and upright position.

### Technical Specifications

- Length: 1,80m
- Head width: 8cm
- Head height: 5cm
- Weight: 213gr.
- Made of high impact nylon with a durable and flexible polyurethane cleat and a highly flexible fiberglass rod.
- StrapBandit® works with all types of plastic and corded strapping.

### Benefits

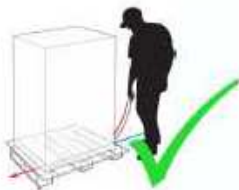

#### Reduce repetitive stress injuries

Of all workplace injuries requiring days away from work, over 40% is related to back injuries, requiring a median of seven days to recuperate. Threading pallets from a standing position reduces bending and stooping significantly. The 1.80m length of the StrapBandit® means a 1.20m Europallet can easily be threaded all the way through, while barely leaning over.

#### Reduce production time

With the kneeling, bending and do-overs, existing tools can take 10-30 seconds per strap to be attached and released. A hundred straps can take up to 50 minutes to thread. The StrapBandit® can handle the same hundred straps in about 9 minutes. That's a massive increase in efficiency!

StrapBandit® is designed to make the pallet threading process faster, safer and better!

Does not get stuck on boards under the pallet
